ACRE
SEASIDE CAMPUS

With small classes, engaged professors,
and academic, athletic, and visual &
performing arts offerings—
we're here to help you shine.

Be innovative. Be exceptional.

Be an Endicott Gull.

A beautiful seaside campus, an active and energetic community, exceptional faculty, and outstanding career guidance—there really is no other place like Endicott. We offer countless opportunities to get involved and pursue your passions, and you will feel the school spirit and Endicott pride the minute you step onto our vibrant campus.

But what truly sets Endicott apart are the opportunities for you to *learn by doing*. We call this the **Endicott Experiential Edge**. As the first school in the country to require three internships of every student, our goal is to give you an excellent education—in the classroom and out. We do this through our strong academic offerings, our unique internship program that gives you real-world experience with some of the top companies in the world, and by providing opportunities and career support that set you on the path to your career, so that you graduate with a degree in one hand and an impressive resume in the other.

Our favorite traditions

Homecoming & Family Weekend

Regatta on the Lakes

ALS Ice Bucket Challenge

Sporting events and art exhibits

Sunsets on the beach

Food trucks

"Endicott creates a truly remarkable community. Not only am I able to pursue my dream career, but I am able to still participate in clubs and athletics that align with my passions and make forever friends along the way!"

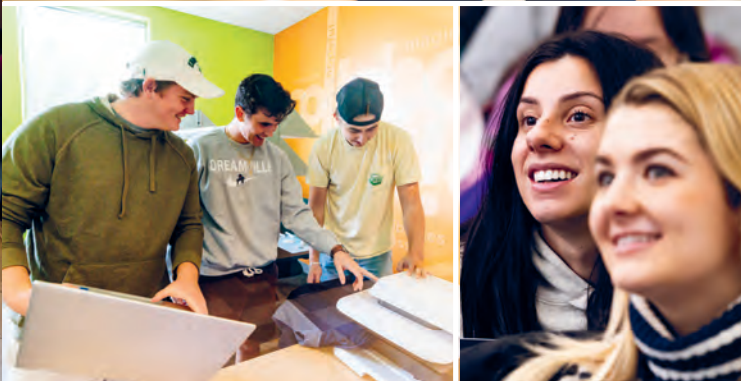

At Endicott College, you can find your passion.

Endicott is unique in that we offer a broad range of majors in a smaller school environment. A quick review of our many programs of study across seven undergraduate schools will give you a glimpse of our extensive academic offerings. What are you interested in learning? What do you think you want to do? You will have the opportunity to explore a multitude of interests and experience a variety of courses across academic disciplines. And why wait until you've already taken several classes to discover if you're on the right path? At Endicott, you will take two classes in your academic major in your fall semester as a first year student. This allows you to get a sense of your major your first semester of your first year, and decide early on if it's right for you or if you want to find a better fit.

Another Endicott advantage? Our small class sizes allow you to make more personal connections with classmates and professors. Our engaged and approachable faculty care about your learning and genuinely want you to succeed. Here, you're not just a number or a person in the crowd—the professors know your name.

You will also benefit from outstanding facilities and resources. Take a class in our new state-of-the-art building for nursing and sport science. Turn that idea you've been kicking around into reality with our 3D printing Makerspace and cutting-edge technology for STEM. Create art and music in our inspiring studio spaces or prepare for a fast-paced future with our interactive multimedia classrooms in our business school. No matter your path, you will have access to resources that will prepare you for a highly competitive job market.

Internships

today lead to open doors tomorrow.

The job market is competitive. Internships and career planning through the Endicott Experiential Edge will set you apart. You will participate in three internships total, including two 120-hour experiences in your first and second years, and a semester-long internship as a senior.

Endicott students intern in some of the most sought-after companies in the world. Many internships take place in Boston, just 35 minutes away from campus. Students interact with leaders in technology, healthcare, advertising, and business, to name a few. With 35% of students receiving employment through a former internship site or contact, you can count on Endicott to give you the confidence you need to achieve long-term career success.

“I was struck by the percent of students who graduate with a full-time job already in place.”

Carissa Szabo

Major: Education

The combination of a strong education program with robust study abroad opportunities was the magnet that drew Carissa Szabo '24 to Endicott. "The education program here is incredible," she said. "I feel very prepared to be a teacher. The professors do a great job of making sure you get lots of field experience." Szabo continued, "And I always knew I wanted to study abroad. It was like I had a seed planted for my love of international travel. Endicott helped that blossom."

Szabo's travels took her to Kenya during her senior year for a two-week, Endicott-sponsored trip. "The trip was two of the best weeks of my entire life, and also among the hardest," said Szabo.

When she's home on the Endicott campus, you often can find Szabo in the education program's suite.

"Every single professor here knows you not just by your name, but by your character," Szabo said. "I feel heard in my classes and seen as a person. I know all of my peers in my education major in my graduating class. This is the reason I picked a small school. I don't think I would have gotten this somewhere else."

Taylor Yates

Major: Accounting/Sport Management

Taylor Yates '24 came to Endicott because it was one of the few schools that could accommodate his dream of a double major. "Sports is a really hard industry to get into. I thought having an accounting degree in addition to my sport management degree would help me stand out."

In addition to playing both baseball and basketball at Endicott and being one of the basketball team's managers, Yates has excelled academically while having multiple internships in sports and accounting. It's all in pursuit of his ultimate professional goal: a top executive role in the sports world. "It's a lot of work to do all of it, but everyone in the Athletics Department has been so supportive and given me flexibility when I needed it," he says.

And what's Yates' advice to those new Gulls who will be joining the Nest for the first time this fall?

"One of the best things you can do is go out and make connections," Yates said. "Once you get involved in one thing, other opportunities open up, and before you know it, you get involved in everything. Those relationships will benefit you for your entire life."

Percival "Percy" Sibanda

Major: Business Management

Percival "Percy" Sibanda '24 came to the U.S. at the age of 14 from his home country of Zimbabwe, a nation that has long been embroiled in a human rights crisis, to attend Brooks School in North Andover, Mass. Homesick at first, the outgoing and personable student soon found his place within the community. When it came time to choose a college, Sibanda chose Endicott because of its distinct internship program and the opportunity to continue his soccer career for the Gulls.

Now a senior at Endicott, the business management major is pursuing a career as a CPA, and has continued to build community, both as a midfielder for the men's soccer program and through his volunteerism on campus. During the last four years, he has felt embraced in return. "The support I've received from everyone at Endicott has made me feel like a part of this community," Sibanda said. "I'm proud to say this is my home away from home."

"The Endicott [experience] has made me more ambitious," said Sibanda. "I had goals but didn't know if they were achievable. When it came time to apply for colleges, I decided that Endicott was the only school I wanted to go to, so I only applied here. If I was to redo it all, I'd do the same thing. This has been the best four years of my life."

Madison Durfee

Major: Photography

Madison Durfee '24 was particularly attracted to Endicott's photography program because the curriculum is completed throughout a student's four years at the College. "There are some schools where you complete the major requirements only during your junior and senior years," she said. "If you end up not liking it, you only find out when you've already completed half of college."

A born performer, Durfee also continued her theatrical pursuits as a member of the student-run Spotlight Drama Club, as well as the faculty-run Mainstage Theater. Even better, Durfee had the opportunity to become the Mainstage Theater's resident photographer, capturing rehearsals and performances. "It's been really special to combine the two things I love most," she said.

Reflecting on Durfee's four years at Endicott, the breadth of opportunities the College has offered her stands out.

"When I went out and tried new opportunities, I've had so many moments when I experienced things I never could have expected," Durfee shared. "The community around me has been so supportive and believes in me. I would tell my freshman self, 'Don't be scared. Just go out and do it. You don't know what's waiting for you.'"

Be a part of a great community & get involved!

When asked how students would describe the community at Endicott, “welcoming, kind, friendly, and supportive” were mentioned most often. And it’s no surprise. From students to staff to faculty, our close-knit community feels like family.

With 37 unique and accessible all-gender residence halls on campus, five dining options, and more than 50 clubs and organizations available to our students, there’s camaraderie and community at every turn. Cheer with your friends at one of our NCAA Division III games. Join students who participate in our thriving club and intramural sports scene. Pitch your new business idea at our annual Spark Tank competition, or perform in one of our top-tier theatrical performances. At Endicott, there are so many ways to get involved!

Volunteering is another important part of our culture, with 50% of our students participating in a community service program. It’s a great way to give back and meet like-minded friends.

And you’ll have even more opportunities to enjoy all of the unique programming we bring to our school—from comedy nights to dance parties, jazz bands to rock concerts, notable speakers to art exhibits—our community always comes together. We have something for everyone, and your experience will be as varied and interesting as you want to make it!

**From sporting events
to community service—
our community always
comes together.**

“From the second I stepped foot on Endicott’s campus, I immediately felt that this is the place for me to spend the next four years of my life.”

Dina Gentile

**Professor of Sport Management
School of Sport Science**

The primary driver of the esports management degree program at Endicott, Dr. Dina Gentile is helping students tap into a new and fast-advancing industry. The author of *Introduction to Esports Management*, Gentile wrote the textbook inspired mainly by her observations of the strategies and online relationships her son was building as a gamer. Through the program, Gentile is changing the way schools adopt and embrace esports management as an academic discipline. Using existing classes in computer science, the professor is allowing esports students to get a more technical curriculum that tailors their knowledge to include game programming and design. Gentile has presented her work at the AAHPERD Convention, NASSM Conferences, COSMA Conferences, and MAHPERD Convention.

Meet Your Professors

Juan Carlos Morales

**Associate Professor, Graphic Design
School of Visual & Performing Arts**

Juan Carlos Morales teaches a variety of graphic design courses. His positivity and creative mind push students to reveal their own creativity, most recently in real-world projects for local nonprofits. Originally from Colombia, Morales has worked with numerous top-tier agencies and launched his own firm, Fabrika Studio. He describes Endicott as “different, intimate, and people-oriented.” Since joining the full-time faculty in September 2021, he’s pushed the envelope with avant-garde course activities, design binges, and multidisciplinary projects.

Bethany Nasser

**Assistant Professor of Nursing
Cummings School of Nursing & Health Sciences**

After working as an instructor at Massachusetts General Hospital, Dr. Bethany Nasser knew she wanted to teach, so she went back to school to get her master’s degree. She has been a nurse educator for 30 years and in 2024 was named Faculty of the Year, an honor awarded based on student votes. Nasser is a favorite faculty member because of her connection to students and the positivity she brings to every class. She is known for imparting “Nasserisms” to her students, bits of wisdom and life lessons her nursing students have come to cherish. She advises students who are ready to seek a job that their happiness and working with people they like who will mentor and help them grow is worth more than any money they could make. Above all, she encourages students to do what makes them happy.

Luke Reynolds

**Associate Professor
School of Education**

The author of 17 books, Dr. Luke Reynolds most recently turned his pen toward the stories of 60 public figures who each turned a personal trauma into resilience. Reynolds intimately understands trauma—years ago, he survived a head-on collision and is lucky to be alive. In his latest book, *Braver Than I Thought*, Reynolds said, “I wanted to explore people I admired and look at their lives through the lens of how they learned to live with trauma, cope with it, and still be the best versions of themselves.”

Jessica Ventura

**Associate Professor, Mechanical Engineering
School of Science & Technology**

Dr. Jessica Ventura is a mechanical engineer specializing in the biomechanics of human movement. Educated at the University of Texas at Austin, Ventura uses personalized biomechanics analysis to inform runners and athletes of injury risk and helped create the curriculum for Endicott’s undergraduate engineering program. She also helped establish the Endicott affiliate of the Society of Women Engineers organization.

Ryan Blodgett

**General Manager, La Chanterelle
& Culinary Arts Instructor
Curtis L. Gerrish School of Business**

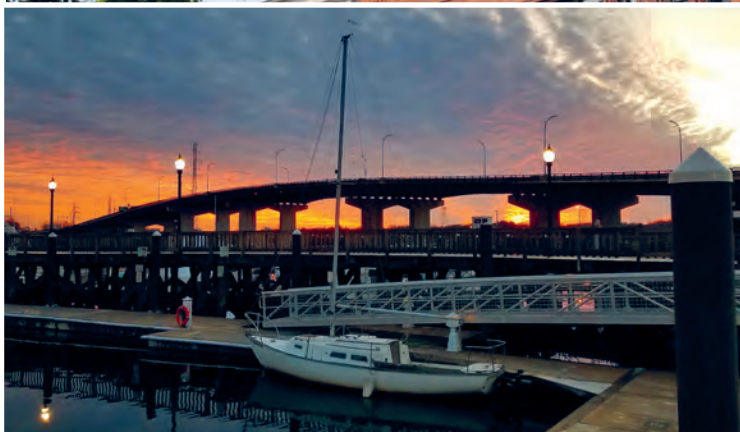

With more than 20 years of experience in the food and beverage industry, Ryan Blodgett has worked throughout the North Shore in several prominent restaurants, experiencing management-level employment in both the front and back of the house. Blodgett was able to earn degrees in culinary arts and hospitality, including his MBA from Endicott, while working full-time as a bar manager with wine menus boasting over 400 labels. He believes that when students learn the workings of a restaurant at La Chanterelle, they build transferable management skills. “That’s what we tell students in that first workshop. *You’re learning transferable management.* How to time manage yourself, your team, your surroundings, everything,” said Blodgett. “It’s the students’ managerial classroom.”

Elizabeth Matelski

**Associate Professor of History
School of Social Sciences, Communication,
& Humanities**

Passionate about American multiculturalism, popular culture, and incorporating digital technology into her history teachings, Dr. Liz Matelski has most recently delved into the legacy of American slavery to uncover the truth behind the namesake of Endicott’s own Mingo Beach. A recipient of the 2022 inaugural Tadler Center Fellowship, Matelski is also Co-Director of the National Endowment for the Humanities Summer Seminar “The Salem Witch Trials: Their World and Legacy,” a three-week institute for middle and high school teachers. She was the recipient of the 2022 Endicott Academic Excellence Award.

Explore your surroundings from Beverly to Boston.

In addition to its beautiful central campus, Endicott has three private beaches that run along the coast of the Atlantic: Mingo Beach, Patch Beach, and Endicott Beach. Whether you choose to walk along the shore, hang out on campus, or explore our three miles of hiking trails, there's no shortage of ways to stay active and inspired.

And there is so much to do beyond our campus! Downtown Beverly is less than 10 minutes away and boasts theaters, favorite coffee shops, and eateries. It is also next door to historic Salem, famous for its witch trials, Halloween, and classic literature. Take a train north to Gloucester, home of America's oldest seaport. Or venture south into Boston—only 35 minutes from campus and steeped in history, tradition, and culture—where you can visit Faneuil Hall, Newbury Street, Beacon Hill, and Fenway Park. And you can even travel north to explore scenic shorelines, mountain views, and the best ski slopes in the Northeast.

It's a great day to be a Gull.

"My favorite memory so far has been this past season of football, as there was great community engagement at all of our home games."

You may aspire to play on one of our 21 NCAA Division III intercollegiate athletic teams, compete on one of our six club teams, participate in an intramural league, or pursue a program of study in the School of Sport Science. No matter your goals, Endicott's talented coaching staff and distinguished faculty are there to support you.

We want to help you live a healthy, physically-fit lifestyle. Our tennis courts, athletic fields, Raymond J. Bourque Arena, and Post Sport Science & Fitness Center are open to all students, day and night, inviting you to be active and involved when it works for your schedule.

Whether you're on the field, in the stands, or at the gym, you will feel the school spirit and Gull pride!

ENDICOTT STUDENTS GRADUATE WITH INTERNATIONAL EXPERIENCE

POPULAR DESTINATIONS

27

PARTNER UNIVERSITIES

It's a great big world out there.

Studying abroad is a once-in-a-lifetime experience and an essential part of Endicott's experiential learning model. All Endicott students, regardless of major or athlete status, are able to study abroad. Typically, students spend a semester overseas sophomore or junior year or take a short-term faculty-led trip early on. With partners in countries around the world, there is a program for every type of student.

The benefits of studying abroad are numerous, from gaining a global perspective and making friends around the world to bolstering your resume and opening doors to future employment

opportunities. All Endicott students are encouraged to study abroad and do their semester-long internship abroad if they can, so get your passport and get excited!

To learn more about becoming a Global Gull visit endicott.edu/international.
